

BUILDING DYNAMIC FRONTEND COMPONENTS FOR MY MARKETPLACE

This documentation provides as in-depth analysis of the key functionalities for a dynamic marketplace, emphasizing modularity, reusability, and integration with Sanity CMS . Each feature is described comprehensively, followed by a conclusion summarizing the approach.

1.FUNCTIONALITIES OVERVIEW

The product implements the following core functionalities:

- 1.Product listing page**
- 2.Dynamic routes**
- 3.Product detail page**
- 4.Cart functionalities**
- 5. Checkout**

- **Product listing page**

- The product listing page displays all the furniture items available in the marketplace.
- Dynamic data is fetched from the **Sanity API** and rendered as reusable product cards.
- Each product card includes essential details like the name, price, description, and an image.
- Additional functionality such as search and filters (by category or price range) enhances user experience.

Our Product

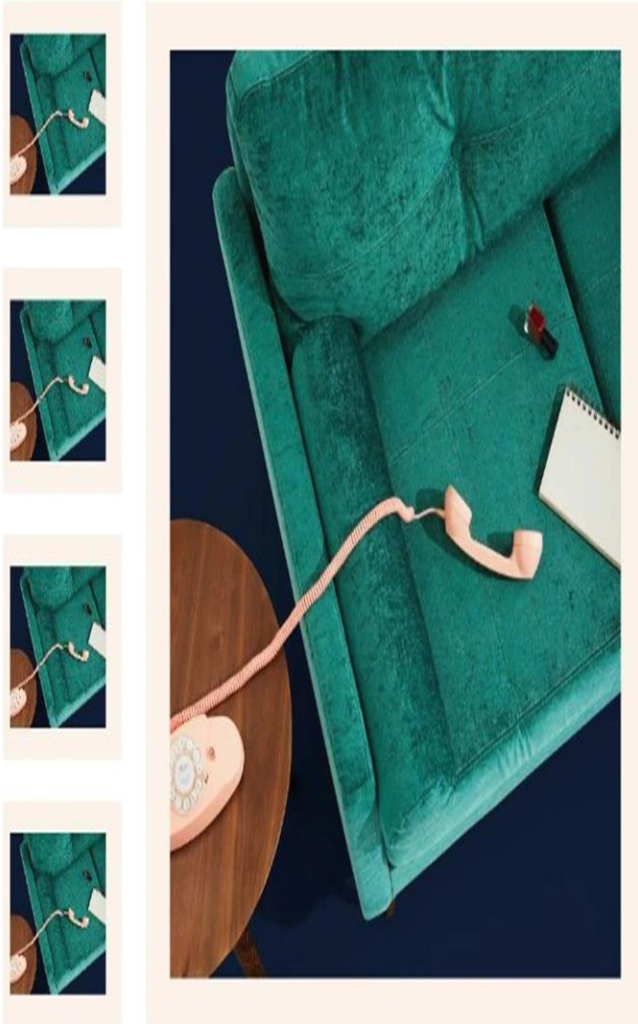

- **Dynamic routes**

- Implemented dynamic routes for individual product pages.
- Clicking on a product redirects users to a detailed product page.
- Dynamic routing ensures that each product has a unique URL, improving SEO and user navigation.

- **Product detail page**

- The product detail page presents a description for a selected item of furniture.
- High-resolution images, product descriptions, dimensions, materials, and pricing.
- Dynamic Content: Data displayed is dynamically fetched based on the route's product ID.
